

Grinding Device ASG 300 and ASG 1000

Mobile profile grinding device with belt grinder.

This device is ideal for preparing wedge connections on drive belts and various transport belts.

The belt end is fixed to the grinding table and a diagonally arranged belt grinder is moved crosswise to the belt direction by hand.

The diagonal position of the belt grinder can be adjusted. The grinding pressure is generated by the dead weight of the belt grinder and the pressure generated by hand.

A supporting roll with depth adjustment serves for producing an even wedge thickness.

Various grain sizes of the grinding belt can be supplied.

Technical Data		ASG 300	ASG 1000
Belt width max. (90°)	mm	300	1000
Belt width max. (80°)	mm	270	970
Belt width max. (60°)	mm	160	830
Belt thickness max.	mm	8	8
Length	mm	560	560
Width	mm	680	1165
Height	mm	310	400
Weight (net)	kg	32,0	42,0
Voltage	V	230	230
Capacity	W	1010	1010
Belt speed	m/min	210 – 440	210 – 440
Grinding length	mm	120	120
Dust bag		standard	standard
